

# unearthing the past roman archaeology

Schools outreach session  
for Key Stage 2

Use our collection of genuine Roman coins and artefacts to find out more about archaeology!

Find out about the different archaeological methods used in the field and consider how archaeologists piece together evidence. Set the historical context of our museum objects by making a physical timeline to show just how long has passed since the Romans were living in Britain.

KS2 History  
KS2 Science

Investigate our collection of Roman coins closely, and use a key to identify and date the coins.

Develop your skills of interpretation by analysing evidence from genuine and replica Roman finds to discover more about Roman life in Britain.

Session length: 1 hour
